This chart references a real UtiliSave client. The numbers represented are the actual savings / refunds delivered each year.

Our in-depth knowledge of the water carrier’s rules and regulations coupled with our detailed physical inspections of this client’s portfolio of buildings led to the identification of a series of billing errors, specifically in the billing methodology used by the carrier. This error covered a 4 year period of billing. Leveraging our expertise and strong negotiation skills, we were successful in securing significant savings, both retroactively and on an ongoing basis for this client.

Over the years, our periodic audits have resulted in additional savings from errors in fire meter billing, errors in consumption and demand, fiscal rates, multiplier errors, and double billing. We have also secured savings by identifying more beneficial service classifications.
